Subject: Prior Testing Summaries
Water Defense Flint Summary Results Mar-Apr 2016.xlsx

...

Mark,

Per our discussion, here are prior testing summaries one one spreadsheet and note all the tabs per home.

Looking at the water heaters and only to you, is it possible that what we are seeing in the water heaters and/or in the distribution system – iron, phosphorus, etc. - are food for the fungi/mold and is it possible that people are reacting to the fungi/mold?

Would it be beneficial to test a few of the homes across the street from Ex. 6 - Personal Privacy house – where there are no reported health issues - including the water heaters and then the showers and then compare? I would be happy to do this as Water Defense and provide you the data.

Also, we could go back and analyze the retained samples at ALS for fungi/mold/bacteria if you think that would be helpful.

Thanks.

Best Regards,
